# IF YOU'RE WANTING TO HAVE A SMOOTH, RADIANT, GLOWING COMPLEXION THEN LOOK NO FURTHER! I HAVE THE SECRETS TO ACHIEVING THAT LUSH FLAWLESS SKIN!

## PREPARE - REVIVE - REPLENISH - PROTECT

4 Easy steps to follow and you will be well on your way.

Prepare - The skin is our natural barrier against dirt, dust, pollution, oil sweat and other contaminants, protecting us from harmful daily elements. Over time the build up of these contaminants can cause irritation, a build up of dead skin cells, and pores can become clogged.

By following these steps to give your skin a thorough deep clean you are making it ideal for the delivery of my anti-age defying treatments.

1. Begin applying GENTLE CLEANSER to a dampened make up removal pad. Stroke down the length of the lashes to remove the eye make up. Repeat until all eye make up is removed.

2. Dispense one bead of CLEANSING GEL onto wet hands and create a lather.

3. Immerse two facial wipes into warm water and remove cleanser. If you had heavy coverage of make up, please repeat the cleanse with CLEANSING GEL or GENTLE CLEANSER if you have sensitive skin.

**4.** Dispense one bead of ENZYME EXFOLIANT onto wet hands. Work the ENZYME EXFOLIANT into the neck and chin, evenly distribute to the entire face.

**5.** Take 30 seconds to use small circular movements with the fingertips to apply the enzyme exfoliant to the face.

**6.** Leave the enzyme exfoliant on the skin for a further 2 minutes.

**7.** Thoroughly remove the enzyme exfoliant with dampened disposable wipes or face washer.

**8.** Repeat the step with the GENTLE CLEANSER to ensure all the exfoliant has been removed thoroughly.

The deep cleanse is the ideal procedure before the Intraceuticals intra-layering.

## REJUVENATE GENTLE CLEANSER-

Coddle skin especially if skin is sensitive, dry or irritated

**Who is it for?** Dry, sensitive or irritated skin

**What it does:** Remove make up and prepares for this luxe treatment cleanse

**Benefits:** Gentle, plant based cleanser designed to maximise the benefits of Intraceuticals layering system. Many cleansers can leave a barrier that can block your skins potential and strip the skin of its friendly balancing act.

**Power Ingredients:** **Ginger Root extract-** Naturally derived from the ginger root quiets redness and inflammation, reboots circulation, works in partnership with Bisabolol to help soothe and calm the skin. **Bisabolol** – Chamomile-derived rehab and resistor daily stress.

## REJUVENATE ENZYME EXFOLIANT

Fresh from the clinic, just short of a peel.

**Who is it for?:** Dull, rough, uneven skin, oily, congested pores or problem prone skin.

**What it does:** Clarify and renew the skin's surface to reveal a fresh and glowing complexion. Prepare to be impressed. We use 3 powerful forms of exfoliation plus a super fruit from the Australian rainforest to create a customisable mini peel treatment.

**Benefits:** Fruit enzymes soften and help smooth the skin surface, while lactic acid promotes cellular renewal, and salicylic acid helps clear and refine visible pores. Gentle Carnauba and wax beads help lift and manually sweep away dull skin. Amplifies skin radiance and provides a perfect base for Intraceuticals Hyaluronic layering system.

**Power ingredients: Papain and Bromelain** - Stabilised natural fruit enzymes from Papaya and Pineapple reduces swelling and inflammation bringing a new luminosity to the skin. Brightness is increased and surface imperfections reduced, making for soft, smooth skin.

**Carnauba, Beeswax and Bamboo Beads** - non irritating agents that gently roll across the skin. Skin irregularities are reduced and the skin appears more radiant. Bamboo beads help increase the elimination of dead skin cells and polish the skin, leaving it smoother and radiant. **Lactic Acid** - reveals the newer, shinier, healthier skin underneath. Reduces fine lines, improving skin tone and texture, fades pigmentation, and evens out the colour of your skin, controlling and preventing breakouts. This even and effective exfoliation from consistent use of AHA's helps stimulate collagen production, which means firmer skin and less wrinkles. **Kakadu Plum** - the world's highest source of vitamin C fights oxidative stress to reduce the appearance of wrinkles, improves skin radiance and boosts skin luminosity. Especially designed to provide a topical supply of antioxidants necessary to fight free radical-induced skin aging. Stimulates Collagen production and Hyaluronic Acid Synthesis. Reduced appearance of wrinkles, increases skin radiance, glossiness and luminosity.

## REJUVENATE CLEANSING GEL

Resurface skin and youth with this clarifying cleanser

**Who's it for?:** For oily, congested or pore-plagued skin, it's a very fresh start.

**What it does:** For everyone else, it's the absolute primer for interlayering.

**Benefits:** Plant based cleanser with Salicylic Acid to provide a boost to your cleansing routine, refine skin texture.

**Power ingredients: Salicylic Acid** - Salicylic acid is the only beta-hydroxyl acid used in the skin care. Salicylic acid causes more rapid cell turnover of the upper layers of the skin to expose younger looking skin. This opens up the skin's pores and increases collagen production. **Decyl Glucoside** - provides deep pore gentle cleansing leaving the skin soft and clean ready for hydration.

## Preparation Matters

This is a great second cleanse after Gentle cleanser to remove every last trace of the day, heavy foundation or before a Rejuvenate Enzyme Exfoliant weekly treatment.

Using these products and this method followed with Intraceuticals 3 step layering system for the most luxuriously, soft, radiant skin you will love!
